Continuation of Substance of Interview including description of the general nature of what was discussed: The examiner brought Dean et al. (Am. J. Hum. Genet. Vol. 55, pages 788-808, 1994) to applicant's attention. Applicant presented 4 technical reasons why the lysis buffer of Dean containing 20mM Tris pH 8.0, 1% SDS and RNase A would not be combinable with the teachings of Shieh and Harvey, directed to drying a lysis reagent on a solid support. Further consideration was given to the declaration filed by Dr. Dirk Loeffert discussing the ability of SDS to denature RNase. Applicant agreed to file their technical reasons in the form of an interview summary for completeness of the record.
